Subject: **Demolition of Temporary Building and Proposed Permanent Classroom Extension at Rownhams St Johns C of E Primary School, Bakers Drove, Rownhams, Southampton SO16 8AD**

Thank you for the opportunity to comment on the above application. The applicant seeks permission to demolish an old temporary freestanding classroom, and replace it with a permanent extension to the school.

The applicant submitted a Design and Access Supporting Statement in support of their application. This states that the school will not cater for any additional pupils as a result of this planning application. Therefore, no additional trips on the highway will be generated by this development.

The Design and Access Supporting Statement also details construction methods to be used during the erection of the extension to the school. This states that a site compound will be erected in the southern corner of the playground, to minimise disruption to the school, and provide easy access onto the main road.

The Design and Access Supporting Statement also identifies that lorry movements will be associated with the development, anticipating two lorry movements a day during certain stages.

Measures to prevent mud and spoil entering the highway from vehicles leaving the site will be taken.

There will be no vehicular movements to the construction site between 0830 and 0915, and 1500 and 1545.

Recommendation: I no objection to the above development from a highways and transport perspective.
