Dear Sir/Madam

THE PROPOSAL INVOLVES THE EXPORTATION OF SURPLUS MATERIAL GENERATED BY THE CONSTRUCTION PROJECT

THE HAMPSHIRE ROSE BOWL, BOTLEY ROAD, SOUTHAMPTON HAMPSHIRE SO30 3HA

Thank you for consulting the Environment Agency on the above application which we received on 18 February 2011.

Environment Agency Position
I can confirm that Environment Agency has no objection to the proposed development as submitted.

Advice to Planning Authority / Applicant:

The applicant has an Environmental Permit from the Environment Agency to treat inert waste to manufacture aggregates and soil replacement material and the recovery of this material by means of its use on the Rose Bowl project in the construction works (drainage, foundation, access, roads, etc), reprofiling and extending the golf course and landscaping.

It is accepted that as part of the treatment process there may from time to time be incidental residual material that is not suitable for use on site but will need to be exported. Unless the material meets end of waste criteria the receiving site may need an authorisation from the Environment Agency. The following link may be of use.
