Subject: Efford Landfill Site, Milford Road, Pennington – Variation of Condition 1 of Planning Permission 11/97341 to extend the time for the completion of the restoration

Thank you for passing me the above application for comment. The application is for the variation of condition 1 of Planning Permission 11/97341 which states that the infilling and restoration of Phase 4D shall be completed by 31st December 2012. The application seeks to extend this deadline to the 31st December 2013.

The application does not propose an increase to existing vehicle movements and an update of accident data within the proximity of the site shows there are no significant patterns attributed to vehicle movements from the site. Therefore I can confirm that I have no objections to the principle of the application.

Recommendation: There are no Highways and Transportation objections to this Planning Application subject to the following conditions being attached to the permission if granted:

- Measures shall be taken to prevent mud and spoil from vehicles leaving the site during the restoration works being deposited on the public highway. These measures shall be implemented before the restoration activities commence and thereafter maintained. No vehicle shall leave the site unless its wheels have been cleaned sufficiently to prevent mud being carried on to the public highway.

  Reason: In the interest of highway safety

I trust that the above is clear should you have any questions please do not hesitate to contact me on 01962 846815.
