Subject: **Planning Application Consultation HCC/2012/0030: Supply Deliver and Erect two modular constructed bays to match the existing building on site to provide extra space to increase the number of pre-school child places in the area at Rowner County Infant School, at Copse Lane, Rowner, Gosport, Hampshire, PO13 0DH**

Thank you for the opportunity to comment on the above referenced application. The applicant seeks to expand the school by erecting two modular constructed bays.

The erection of the extra classrooms will increase the capacity of the school. There is no indication of how many extra pupils will be enrolled at the school, and there is no indication of how many pupils are currently enrolled in the school, for comparison.

The users of the extra classrooms will access Copse lane using the same access as the rest of the infant school.

There is no indication of when the modular construction bays will be erected on site (i.e. school term time or school holidays), when they will be retextured /painted (and how long these processes take) or the highway implications of this such as lorries delivering the bays.

Recommendation: I have insufficient information to give a positive recommendation at this time.

I trust that the above is clear but I would ask you not to hesitate to contact Stewart Rose on 01962 813864 should you wish to discuss anything further.
