*Subject:* The Hurst Community School, Brimpton Road, Baughurst, Tadley - Removal of the existing asbestos cement sheeting by specialist and re-cladding using Kingspan composite sheeting type codes KS1000RW(Roof) KS1000MR(Walls), and associated mechanical and electrical works

Thank you for passing me the above application for comment. The application is for the removal of asbestos cement sheeting from the Sports Hall at The Hurst Community School in Tadley. It is proposed that the works will commence in July 2012, lasting for approximately 13 weeks, during which time there are expected to be 6-8 lorry movements per week for a period of up to 2 weeks and then for the remainder of the construction period there are expected to be 2-4 movements per week. The applicant anticipates that a majority of the work will be carried out during the summer holidays, reducing the impact of the work on students attending the college.

The construction compound required for the works is to be located adjacent to the sports hall and it will not result in the temporary loss of any of the parking spaces required to serve the College. Access to the compound will be will be via the main College access on Brimpton Road.

**Recommendation**: There are no Highways and Transportation objections to this Planning Application.
