Except where otherwise stated the source used is Hampshire County Council's 2009 based Small Area Population Forecasts (SAPF)

Notes

The Total Dependency Ratio is the number of children and retired people to every 100 people of working age.

The Child Ratio is the number of children per 100 people of working age.

The Old Age Ratio is the number of retired people per 100 of working age.

The TFR is the number of children that would be born to a woman if current fertility patterns persisted throughout her childbearing life.

The SMR is a ratio of the number of deaths expected if the population experienced the same age specific death rates as England and Wales. A value of less than 100 indicates lower mortality than expected.

The urban and rural classification divides up the Authority as follows: where the majority of the population of an area lives within settlements of 10,000 or more people the area is defined as urban. All other areas are defined as rural.
