

# Hampshire County Council

## Environment service assessments

### How Hampshire County Council delivers its environment services

The service assessment is scored on the following scale:

- 1 = Inadequate performance – below minimum requirements
- 2 = Adequate performance – only at minimum requirements
- 3 = Performing well – consistently above minimum requirements
- 4 = Performing strongly – well above minimum requirements

Service assessment	2005	2006
The Council's performance in services, such as transport, planning and waste, as assessed by the Audit Commission.	3	3

The assessment takes a broad view of council performance across the range of environment services. The service assessment is constructed from two elements:

- performance information
- inspection reports

Service assessment elements	weighting	2006
Environment performance information	100%	3
Waste management inspection reports	—	—
Planning inspection reports	—	—
Transport inspection reports	—	—
Other inspection reports	—	—

Key: — = not applicable or no applicable inspections

## Environment performance information

Performance on specified performance indicators (PIs) is assessed as above, between or below two levels (thresholds) to make three performance groupings:

- above the upper threshold = comparatively high performance
- between the thresholds
- below the lower threshold = comparatively low performance

The number of PIs in each performance grouping determines the score for the performance information element. For detailed information view the service assessment framework technical guide for CPA 2006 on the Audit Commission website ([www.audit-commission.gov.uk](http://www.audit-commission.gov.uk)).

## Performance indicators

Hampshire County Council scored 3 (out of 4) in the performance information element in the 2006 environment service assessment.

PI	Description	Performance
E6	Recycling and composting performance	above the upper threshold
E11	Condition of unclassified roads	
E12	Reducing killed and seriously injured (KSI) road casualties	
E21	Trading standards checklist of best practice	
E30	Consumer satisfaction with trading standards service	
E31	Business satisfaction with trading standards service	
E33	Trading standards levels of business compliance High/Medium/low risk premises	
E40	Reducing slightly injured road casualties	
E1	Progress with LTP	between the thresholds
E8c	Satisfaction with waste disposal (civic amenity sites)	
E14	Satisfaction with passenger transport information	
E15	Satisfaction with bus services	
E18	Condition of surface footway	
E19	Intervention by the Secretary of State under Traffic Management Act powers	
E26	Number of kilograms household waste collected per head	
E32	Trading standards visits to high risk premises	below the lower threshold
E16	Percentage of pedestrian crossings with facilities for disabled people	

For detailed information view the service assessment framework technical guide for CPA 2006 on the Audit Commission website ([www.audit-commission.gov.uk](http://www.audit-commission.gov.uk)).

## Environment inspection reports

Inspections were included in this assessment where they covered a substantial area of the environment function and were published between 1 January 2004 and 31 December 2006. Where the scope of an inspection significantly straddles more than one area, for example waste and planning, then that inspection will count in all relevant areas.

The score is drawn from the current service score (poor to excellent) converted to a score of 1 to 4. The prospects for improvement score is not used in this assessment.

## Transport inspection reports

No applicable inspections.

## Planning inspection reports

No applicable inspections.

## Waste inspection reports

No applicable inspections.

## Other inspection reports

No applicable inspections.

Please visit the Audit Commission website ([www.audit-commission.gov.uk](http://www.audit-commission.gov.uk)) for the full version of this assessment.
