

Annexe to Reasons for Conditions
(as required by Article 22 of the Town and Country Planning
(General Procedure) Order 1995 – as amended)

Hampshire Minerals and Waste Core Strategy DPD 2007

DC3 - Impact on Landscape and Townscape

Minerals and waste development will only be permitted if due regard is given to the likely visual impact of the proposed development and its impact on, and the need to maintain and enhance, the distinctive character of the landscape or townscape. If necessary, additional design, landscaping, planting and screening, including planting in advance of the commencement of the development, should be proposed.

DC6 - Highways

Major mineral extractions, landfills and ‘strategic’ recycling, aggregate processing and recovery and treatment facilities, will be permitted provided they have a suitable access to and/or route to the minerals and waste lorry route as illustrated on the Key Diagram. In all cases, minerals and waste development will only be permitted if it pays due regard to the likely volume and nature of traffic that would be generated by the proposal and the suitability of the proposed access to the site and of the road network that would be affected. Consideration should be given to highway capacity, road and pedestrian safety, congestion and environmental impact, and whether any highway improvements are required and whether these could be carried out satisfactorily without causing unacceptable environmental impact.

DC7 - Biodiversity

Minerals and waste developments will only be permitted if due regard is given to the likely effects of the proposed development on biodiversity and, where possible, proposals should conserve and enhance biodiversity. Development likely to adversely impact upon ‘regionally or locally designated sites or protected species’ – designated in adopted Local Plans or Local Development Frameworks – (including Sites of Importance for Nature Conservation (SINCs), Species of Principal Importance for Biodiversity, Regionally Important Geological Sites and Local Nature Reserves) shall only be permitted if the merits of development outweigh the likely impact.

DC8 - Pollution, health, quality of life and amenity

Minerals and waste development will only be permitted if due regard is given to the pollution and amenity impacts on the residents and users of the locality and there is unlikely to be an unacceptable impact on health and/or the quality of life of occupants of nearby dwellings and other sensitive properties. Where necessary minerals and waste developments should include mitigation measures, such as buffer zones between the site and such properties.
